- Agile collaboration
- Perfectionist and eager to learn

Cross-Cultural Teamwork

Collaborated on international projects in Belgium, France, Romania, Poland, and Denmark. Strong communication and adaptability in diverse teams.

LINA BENHAJ

With a growing interest in computer science, I specialised in software development, with an interest in solution design and IT architecture. Therefore I seek broad functions within IT in the future: business analysis, security or developpement position. Thanks to my background in journalism, I have strong communication skills and an analytical mindset, which I apply when collaborating with both business and technical stakeholders.
